Quartz Surfaces

Imagine the Difference

Colour and Product Portfolio

The Original Quartz Surface

Combining leading edge technology, colour and design innovation, CaesarStone is the ultimate choice in quartz surfaces.

In 1987, CaesarStone was the world's first company to establish a new product genre by harnessing the extraordinary physical properties of quartz, one of nature's strongest and most abundant minerals, to create a unique and beautiful product – the original quartz surface.

CaesarStone quartz surfaces are manufactured from up to 93% quartz, using advanced manufacturing processes that comply with the highest standards of quality control and environmental responsibility.

Style combined with functionality means CaesarStone surfaces are ideal for numerous applications in residential and commercial environments such as benchtops, splashbacks, wall paneling, custom made furniture and more.

Benchtop and splashback in Snow 2141

Geo Washplane® by Omvivo and walls in Snow 2141

Non-porous, waterproof, mould and mildew resistant, CaesarStone quartz surfaces are ideal for bathroom applications. Large slabs provide a sleek and modern aesthetic, minimising joins and therefore maintenance.

The CaesarStone Difference

Scratch and stain resistant	✓
Waterproof - never requires sealing	✓
Heat resistant	✓
Superior strength and flexibility	✓
Mould and mildew resistant	✓
Resistant to most household chemicals, acids and oils	✓
10 Year Limited Warranty	✓

Kitchen Surfaces

The ultimate choice for kitchen applications. Highly durable, food safe and low maintenance are just some of the benefits that make CaesarStone ideal for benchtops, splashbacks and many other kitchen applications.

CaesarStone's superior qualities of strength, stain, scratch and heat-resistance, combined with the latest in colour & design developments mean CaesarStone surfaces will compliment any interior design and look good for years to come.

An increasingly popular choice for kitchen splashbacks, CaesarStone is a grout free, low maintenance alternative to materials such as tiles and glass. A CaesarStone splashback offers colour continuity from benchtop to splashback and cost effective, same day installation.

CaesarStone® is made from natural quartz and therefore some variation in colour and aggregate may occur. We always recommend making final colour selection off an actual sample or a full slab of CaesarStone® as the colours depicted in this brochure are only as close as modern printing methods will allow.

Design Versatility and Solutions

Edge Profiles. Many edge profiles are possible, from the most popular single thickness 20 or 30mm slabs, through to laminated double thickness edge options, which can be fabricated by a stonemason using exclusive CaesarStone® colour matched glues. Our minimum suggested edge detail is a 3–4mm radius on any profile.

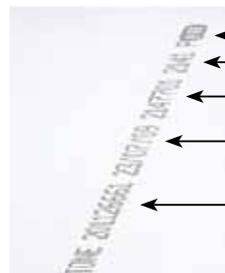

Product Warranty. Every CaesarStone quartz surface comes with a comprehensive 10 Year Limited Warranty. After installation and on receipt of your warranty registration information, you will be provided with a complimentary CaesarStone cleaning kit.

CaesarStone® slab identification.

The underside of every CaesarStone slab is uniquely stamped with identification information establishing authenticity.

- ← Finish Type
- ← Colour
- ← Batch No.
- ← Inspection Date
- ← Slab ID no.

Easy Care. CaesarStone's quartz surfaces never need sealing and require very little maintenance to keep them looking like new. The hard, non-porous surface makes cleaning simple. In most cases, soap and water or a mild detergent are all that are required to maintain its luster.

For extra-stubborn spills we recommend using CaesarStone Cream Cleanser. Cleaning Instructions are provided in our 10 Year Limited Warranty card.

Slab Size and Weights. The nominal dimensions of CaesarStone's quartz slabs are 3060mm x 1440mm enabling greater design flexibility and maximum utilization of the product.

Thickness	Slab Weight	Slab Weight/m ²
30 mm	330 kg	75 kg/m ²
20 mm	220 kg	50 kg/m ²
13 mm	143 kg	32.5 kg/m ²

Environment and Sustainability

At CaesarStone, minimising our impact on the environment is a top priority.

Compliance with Voluntary Safety and Environmental Standards.

CaesarStone's quartz surfaces comply with ISO 9001, ISO 14001, OHSAS 18001, GREENGUARD and is a registered member of USGBC - The American Green Building Council.

Greenguard. All CaesarStone surfaces comply with American GEI (GREENGUARD Environmental Institute) certification which primarily verifies that CaesarStone's products meet the most stringent indoor air emission standards.

Compliance with NSF 51. CaesarStone's products are compliant with the International Health and Safety Foundation sanitary standard, ensuring that our working surfaces are safe for use in all food environments.

Minimal Maintenance. The non-porous quality of our quartz surfaces prevents the growth of surface mold and microbes, therefore requiring minimal maintenance and significantly reducing the need for cleaning materials and detergents that may harm the environment.

High Performance and Durability. Our quartz surfaces are long-lasting and durable, delivering both an improved life-cycle costs and additional investment value. CaesarStone products are supported by a 10 Year Limited Warranty.

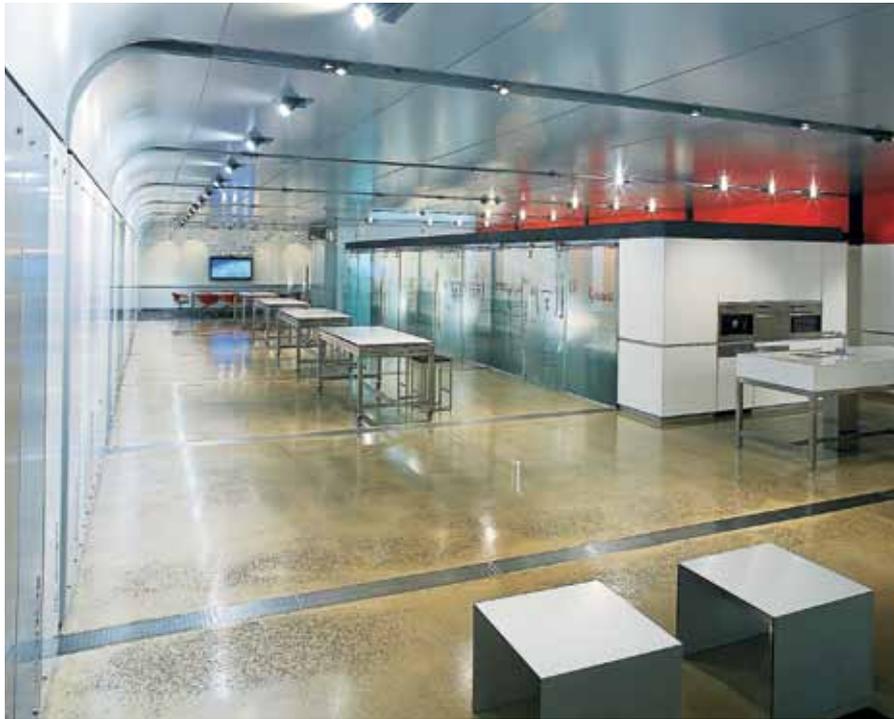

Green Star environmental rating system. Launched by the Green Building Council of Australia, the Green Star rating tools help the property industry to evaluate the environmental design and performance of buildings and to drive the adoption of green building practices.

For more information on how CaesarStone's products may contribute to Green Star credit points, please refer to our "Environmental and Sustainability" information available on our website. CaesarStone Australia is a member of the Green Building Council of Australia.
